Management Discussion And Analysis

INDUSTRY OVERVIEW

The life sciences sector comprising of pharmaceutical, biotech and healthcare delivery is experiencing a modest upswing globally, sustained in part due to launch of newer and expensive drugs, emerging markets demand and encouraging catalytic economic and demographic trends. Aging populations, increasing prevalence of chronic/lifestyle diseases, emerging-market expansion, and treatment & technology advances are expected to sustain the momentum of life sciences sector growth.

The growth is being driven by a number of positive fundamentals including the recent increase in R&D productivity, which has resulted in a turnaround in drug approvals, and the emergence of breakthrough drugs. Excitement surrounding new products including Immuno-Oncology science, antiPCSK9s and other breakthrough treatments addressing unmet clinical needs worldwide. However, efforts by governments, healthcare providers, and health plans to reduce costs, improve outcomes, and demonstrate value is altering the healthcare demand and delivery landscape. It is becoming increasingly evident that the global life sciences sector is operating in an era of significant transformation.

The reimbursement environment for new drug launches is becoming increasingly challenging. Macroeconomic factors including fiscal imbalances in larger economies will continue to exert downward pressure on drug prices. Payers and Pharmacy chains are striving to ensure better outcomes with limited budgets; patients are more aware of available treatment options and demanding choice; and new product launches have to deliver measurable improvements over existing therapies to be considered for reimbursement, let alone premium pricing.

Pharma industry's business model is also rapidly evolving from a traditional two party transactions to creating partnerships across multiple stakeholders focused on solving scientific and business challenges. Drug developers are increasingly participating in risk-sharing relationships and other strategic partnerships with academic institutions, patient groups, contract research organizations, and other developers to improve R&D productivity.

The backbone of this sector, R&D has conventionally remained capital intensive due to long development and approval cycles. Rising R&D costs, driven mainly by increased expenditure and higher failure rates

for drugs tested in human subjects has led the average cost to develop and gain marketing approval for a new prescription medicine increase to an estimated \$2.56 billion¹ per approved drug. The number of new drugs entering the market had decreased since the mid-2000's. However, for the last couple of years, encouraging trends are being observed indicating a shift in the scenario. The number of new drug approvals by the USFDA has been steadily increasing. The scenario seems more optimistic considering the fact that the majority of newly approved drugs are either first-in-class drugs or orphan drugs, signifying the industry's capability to achieve results regardless of cost-cutting measures.

According to EvaluatePharma® market for prescription drugs will grow by a robust 4.8% per year (CAGR) to reach \$987bn by 2020.

■ Pharmaceutical sales ● Growth per year

A positive outlook triggered by attractive fundamentals offer cause for optimism for Life sciences. In spite of worries about long-term global pricing and market access, the sector continued to attract funding and attractive valuations.

While the ongoing transformation and structural realignments offer substantial challenges to established larger pharmaceutical companies globally, it offers a unique opportunity for India-based innovation companies

to contribute to global efforts to move standards of care in difficult diseases with affordable options. India is well positioned to leverage and build on the competencies developed during the first wave of pharmaceutical innovation in the country such as in Medicinal Chemistry, Pharmaceutical Sciences and Industrialization / Scale-up of products to foster globally competitive pharmaceutical innovators. SPARC enjoys an opportunity to be a significant player in this evolving landscape.

OPERATIONS REVIEW

Your Company earned revenues of ₹16421.91 lacs. The source of revenue largely includes royalty income and milestone payments received for the projects out-licensed to partner (s) previously.

Our revenue streams are not linear as expected for any R&D company or company licensing the product or technologies to partner for commercialization. This non-linear trend of revenue would continue for coming quarters as well.

Your Company reported a loss of ₹6999.20 lacs. The major expenses were attributed to conduct of clinical trials associated with our late stage programs and towards employee cost. We also made significant investment in enhancing our labs at Vadodara to support the ongoing projects.

Your Company raised ₹25000 lacs through rights issue. The issue was made open for subscription

in March 2016 and concluded in April 2016.

In the year ahead, we anticipate increase in our clinical trial spend, owing to the fact that we have initiated clinical trials of our programs last year and some of our pipeline projects would enter the clinical trial stage in the coming year. We are also working on building partnerships with several reputed universities to get access to early translational research work which may also add to the expenditure.

Your Company has also identified potential risks associated and has developed a risk management plan to protect/minimize the organization from the potential impact of the risk.

THE YEAR 2015-16 IN A NUTSHELL

SPARC has made significant progress in advancing some key programs in last year. We have accelerated recruitment in the pivotal clinical studies of Baclofen GRS and initiated work on pivotal studies for DPI and Taclantis™ (PICN). Your Company completed 3 preIND consultations with USFDA and obtained guidance for the required development path for registration in USA. Your Company also filed 4 INDs and initiated first in human study for 3 programs.

In today's times to stay ahead of competition, it's necessary and important to look outside and search for innovative ideas and science. SPARC has initiated networking with global universities to scout for new breakthrough ideas, emerging targets and technologies for developing path-breaking treatments. During last year SPARC entered into a research collaboration with one the top universities in the USA for a promising new target in Oncology. We also signed an 'option to license' agreement for an Ophthalmology program with a start up company spun out of a leading university in the Netherlands

We have had couple of unexpected regulatory challenges with rescindment of marketing authorization of Elepsia™ XR by USFDA and delay in Xelpros® approval. Both of these events were linked to the cGMP compliance

status of the manufacturing site of our manufacturing partner. This has resulted in delay in generating revenues from these promising programs.

Taclantis™ (PICN) a promising and safer anticancer agent which obtained marketing authorization in India last year was successfully launched and commercialized this year. PICN is well received by cancer physicians in India.

While maintaining momentum of these programs, we also augmented capabilities by significantly enhancing clinical development and regulatory team and also made additional capital investments in enhancing biology labs in Vadodara.

In a nutshell, your Company made significant progress in the year 2015-16 and set the stage for critical revenue generating opportunities and milestones.

UPDATE ON KEY PROGRAMS

XELPROS®

Xelpros® is a BAK (Benzalkonium Chloride – a preservative which has side effects on eye on long-term use)-free Latanoprost eye drops developed with our proprietary Swollen Micelle Microemulsion (SMM™) technology. Xelpros® is expected to be safe for eyes on long-term use in Glaucoma patients.

We are also assessing and evaluating alternate manufacturing sites for Xelpros® as a backup plan to support commercial manufacturing.

SPARC licensed Xelpros® to a US subsidiary of Sun Pharma. We are working closely with Sun Pharma's marketing team to put together a strategy for the launch of Xelpros® in USA.

SPARC's NDA (New Drug Application) for Xelpros® is under review with USFDA. There were no additional data requirements in the Complete Response Letter we received from USFDA; however, the approval has been delayed pending the cGMP clearance of the manufacturing facility of Sun Pharmaceutical Industries Ltd (SPIL) - our out-licensing partner.

SPIL is working with USFDA in resolving the cGMP deviations at the facility and has taken several corrective measures.

Swollen Micelle Microemulsion Particle

ELEPSIA™ XR

Elepsia™ XR Tablet

Elepsia™ XR is a novel once-a-day formulation of Levetiracetam, a commercially successful antiepileptic agent. The average daily dose of Levetiracetam in majority of patients is in the range of 2000mg to 3000mg per day. However, only 500mg and 750mg strength once-a-day formulations are available in market today which makes it necessary for patients to take multiple pills in a day.

Elepsia™ XR is designed as higher strengths of 1000mg and 1500mg once-a-day tablet for reducing pill burden. Although the dose per tablet is high, the proprietary Wrap Matrix™ Technology of SPARC, helps Elepsia™ XR tablets to be formulated with very less excipients, thereby making the tablet compact and better acceptable for patients.

BACLOFEN GRS

Elepsia™ XR was the 1st NDA approval of SPARC; however, SPARC received a Complete Response Letter (CRL) from the USFDA rescinding its earlier approval, citing that the compliance status of the manufacturing facility was not acceptable on the date of approval. Elepsia™ XR was filed from SPIL's Halol manufacturing facility.

SPIL is working with USFDA to resolve the issues. We have also initiated steps for site transfer to an alternate manufacturing site in US as a back-up plan.

Because of this unforeseen development, SPARC's plan to out-license and commercialize this product has been affected resulting in delay in cash-flow.

Baclofen GRS, is a novel once-a-day formulation of Baclofen, a centrally acting, antispasmodic drug, based on SPARC's proprietary Gastro Retentive Innovative Device (GRID™) technology.

GRID™ Schematic Representation

Baclofen continues to remain a gold standard for the treatment of spasticity associated with multiple sclerosis. Baclofen gets absorbed from a very narrow stretch of upper gastrointestinal tract and hence it is hard to make a truly once-a-day formulation. This is precisely the reason why there is not a single once-a-day baclofen formulation in the US market in spite of the drug being in use since decades.

SPARC's GRID™ platform technology retains Baclofen in stomach for an extended period of time and thus makes it a truly once-a-day formulation.

Baclofen GRS is currently in pivotal phase-3 clinical trials in the USA.

Till date, 179 patients of the required 240 have been enrolled in the study. We have taken several steps to accelerate the recruitment like weeding out non performing sites and adding new sites. We have also contracted a CRO in EU and opened recruitment at sites in Europe.

Additionally, Duration of Action Study is ongoing in the USA, 82 patients have been enrolled in the study against a plan of 135 patients. We expect to complete the enrollment by Q4FY17.

We expect to file the NDA for this product in FY18.

PACLITAXEL INJECTION CONCENTRATE FOR NANODISPERSION (TACLANTIS™)

Nanotecton™ particle

patients who are prescribed conventional Cremophor® based Paclitaxel formulations are administered high dose steroids to prevent allergic reactions which are sometimes very serious and life-threatening.

With Taclantis™, physicians need not give steroids as it's very safe and not associated with serious allergic reactions.

SPARC has completed initial exploratory pilot studies to establish bioequivalence with nab-Paclitaxel. The data suggests Taclantis™ may meet the bioequivalence criteria as defined by USFDA. SPARC therefore is planning to initiate pivotal BE study. The protocol has been finalized and submitted to regulators and ethics committee for approval. Subject to receipt of this

Taclantis™ is developed using SPARC's proprietary Nanotecton™ technology. Unlike marketed Paclitaxel formulations, Taclantis™ is a Cremophor® and Albumin-free formulation with the advantages of simple infusion method and shorter infusion time. Taclantis™ (PICN) also eliminates the need for high dose corticosteroids as premedication. Typically,

approval, SPARC expects to commence patient enrollment in FY17.

The bioequivalence route provides a shorter time to get to market and at much lower costs compared to the pivotal phase 3 clinical studies. We therefore are keeping clinical trials in Breast cancer and Cholangiocarcinoma indications as an alternate strategy and will consider if necessary. During last year, we have finalized clinical trial protocols in these 2 indications and obtained USFDA concurrence so that we are ready to initiate such studies promptly should the need arise.

SUN – K706

SUN-K706 is a novel and highly selective Bcr-Abl kinase inhibitor, intended for treatment resistant Chronic Myelogenous Leukemia (CML).

There are several drugs approved for the treatment of CML; however, patients stop responding to these treatments over a period of time. Currently, there are very limited treatment options for patients who have failed to two lines of treatment and especially if they have mutations like T315I. Currently, there is only one approved treatment for CML patients with T315I mutation. However, its clinical use has been limited largely because of the off-target toxicities such as arterial thrombosis.

SUN-K706 is a potent inhibitor of Bcr-Abl and its mutant forms, including the T315I mutant.

Safety Pharmacology data indicates that SUN-K706 has no adverse effect liability on hepatic, neurologic, pulmonary and cardiac functions and the planned clinical study will find whether this translates into a benefit in humans.

SPARC completed necessary preclinical and toxicology studies for initiating the first in human studies and successfully filed IND after obtaining guidance in a preIND meeting with USFDA. The first in human clinical study protocols are approved by USFDA and we have initiated the study in USA.

SALMETEROL - FLUTICASONE DRY POWDER INHALER (DPI)

SPARC DPI

SPARC's DPI is a pre-metered, 60 doses, breath activated device to administer combination of Salmeterol and Fluticasone by inhalation.

This device offers uniform delivery of dose, independent of inspiratory flow rate. It consistently delivers higher amount of drug to lungs. It eliminates double dosing and dose wastage. It provides different feedbacks, such as audio, visual, and tactile upon dose administration. The device also offers a glow-in-the-dark feature for easy night-time use. Another salient feature of the device is assistance for the visually impaired patients - a reminder to refill the device when 8 doses are remaining. The device is small, convenient and

easy-to-use and it is compliant with the global regulatory standards.

After obtaining the guidance from regulatory agencies in EU, SPARC has finalized and submitted required pivotal studies protocol, finalized CRO, identified sites and made necessary submissions to the regulators and ethics committees.

We are planning to initiate patient enrollment in Q2FY17 and complete the studies in a year's time.

BRIMONIDINE OD

SPARC is developing once-a-day formulation of Brimonidine using proprietary TearAct™ Technology.

Brimonidine is one of the most commonly used drugs for Glaucoma. Brimonidine decreases synthesis of aqueous humor and increases drainage from the eye. Brimonidine has to be administered thrice a day, leading to patient compliance issues.

Several studies have demonstrated that multiple dose regimens are inconvenient, lead to poor compliance and subsequent suboptimal pharmacological effect in about two-third patients.

In preclinical studies, our product when administered once daily has demonstrated IOP reduction at 24 hours, comparable to currently marketed innovator product administered three times as day.

We plan to conduct the proof of concept study in Eastern Europe and the patients recruitment would be initiated in Q2FY17. We expect to complete this study by the end of FY17.

SUN-597 TOPICAL

SPARC has developed a topical formulation of its novel corticosteroid SUN-597 for steroid responsive dermatoses. In preclinical studies the efficacy of SUN-597 topical was found to be equivalent to currently marketed potent steroids such as Fluticasone and Clobetasol, but superior to marketed low potency steroids, like Triamcinolone and Hydrocortisone.

SUN-597 topical formulation, has also demonstrated low potential for skin thinning and other systemic side effects associated with conventionally used topical steroids in the safety studies conducted.

Last year, SPARC successfully filed IND with USFDA after obtaining guidance for potential registration pathway in a preIND meeting.

SPARC completed a Vasoconstrictor Assay (VCA) study in healthy human volunteers in USA. This study helps in understanding the relative potency of our steroid v/s other marketed drugs and define patient population for further clinical development.

We plan to initiate additional pre-clinical toxicology studies in Q2FY17 which will help us to initiate proof of efficacy study in Atopic Dermatitis and Psoriasis patients which we intend to start by end of FY17.

MINOCYCLINE TOPICAL

Minocycline is one of the largest selling oral antibiotics in USA for Acne. About 3 million prescriptions are generated annually for oral minocycline in USA. However, oral minocycline has various side effects. SPARC has formulated a novel topical Minocycline, which is expected to provide better bioavailability at the site of action with reduced systemic exposure. This may potentially lead to a better safety profile.

The USFDA has recently provided guidance for conducting additional pre-clinical toxicology studies for IND submissions of topical formulations. This additional requirement by the USFDA has led to some delay in our IND submission. We expect to file IND by Q4FY17.

TIZANIDINE ER

Tizanidine is a drug used orally in the management of spasticity and pain. The use of Tizanidine is limited as the currently available Tizanidine immediate release tablets and capsules have a short half-life and hence are required to be taken several times in a day and is also associated with side effects, particularly somnolence.

SPARC has formulated an extended release once-a-day dosage form with its proprietary Wrap Matrix™ Technology. This product has been designed such that the peak plasma levels are at much lower levels compared to the conventional 3 times dosing of Tizanidine. SPARC is targeting for convenience in dosing and will investigate and study whether the extended release dosage form provides a better side effect profile.

ABUSE DETERRENT FORMULATIONS (ADF)

It is estimated that every day in the United States—46 people die of overdose from prescription painkillers⁴. These deaths have more than quadrupled in the past decade and a half. Today, more people die from prescription opioid overdose than from heroin, cocaine, and all other drugs combined, an alarming trend that led the U.S. Centers for Disease Control to declare it an epidemic in November 2011.

Opioids are medications that treat pain in many contexts, from post-surgical relief to chronic severe back pain to end-of-life care. These drugs became more readily available to patients in the late 1990s, and prescription rates nearly doubled between 1998 and 2013.

Controlling the prescription drug abuse has become a key priority for the health care providers, USFDA and the policy makers. USFDA has recently issued guidance for approving new opioid formulations with Abuse Deterrent Design.

Since then the field of developing new opioid drugs with Abuse Deterrent Technology has become intensely competitive and there are several companies developing new abuse deterrent formulations of prescription opioids.

Some products have been commercialized and some are in advanced stages of development. These products are able to demonstrate some form of deterrence to abuse by nasal, injection or by avoiding physical tamper.

However, there are no products or technologies that have demonstrated deterrence to oral multi-pill abuse and approved by USFDA with such label.

SPARC has developed a platform technology to make a formulation which can deter oral multi-pill abuse. We have filed initial patent for this technology. We have had preIND meetings with USFDA for programs under this platform. We also filed IND for one program and completed initial proof of concept studies.

This study has demonstrated viability of our technology and we are now working to optimize formulation so that we can initiate pivotal studies.

OUTLOOK

As we take our NCE and NDDS projects ahead on the research pathway, we're learning about how to manage in a rapidly changing economic & regulatory environment, handle the technical demands of innovation, and balance the requirements of projects that have short-term, medium-term and long-term timeframes.

While some of our NDDS projects are considerably closer to being marketed; we are still in early clinical development of our NCE programs.

HUMAN RESOURCE STRATEGY

The intent of the human resource strategy of the Company is focused on attracting the best talent while also providing growth and learning opportunities to its employees. The HR processes are continuously evolving and aligning with the changing business requirements to create a culture of continuous learning and innovation among our employees.

As on 31st March, 2016, the Company had a dedicated team of 356 people, more than 250 of which are scientists.

With an aim of creating a culture of continuous learning among all our employees, in the financial year, the Company invested in more than 5,000 hours of learning and developmental activities.

RISKS AND CONCERNS

Innovative research is a high risk area, and we have consciously tried to take on manageable risks through our process of project selection, and by simultaneously working on projects with different delivery timeframes and risk profile. But there is every likelihood that an investment may have to be abandoned if a project is dropped or changed in subsequent stages of research progress.

A project may need longer time, or may need additional tests or costs that may not have been initially anticipated. We may or may not find licensing partner to work with, in order to bring the product to market. A competing technology or product might limit the potential for our NCE or NDDS program.

INTERNAL CONTROL SYSTEMS AND THEIR ADEQUACY

SPARC has in place a well-defined organizational structure and adequate internal controls for efficient operations.

The Company has in place internal policies and is cognizant of applicable laws and regulations, particularly those related to the protection of intellectual property, resources and assets and accurate reporting of the financial transactions. The Company upgrades these systems on regular basis. The internal control system is supplemented by extensive internal audits, conducted by independent firms of chartered accountants.

Consequent to the allotment made by the Company on Rights basis, the paid-up share capital of the Company have increased from ₹ 236,687,354 to ₹ 24,68,91,435/-.

DIRECTORS & KEY MANAGERIAL PERSONNEL

Mr. Dilip Shanghvi (DIN: 00005588), retires by rotation at the ensuing Annual General Meeting, and being eligible offers himself for re-appointment.

Pursuant to the resolution passed by the members in their 6th Annual General Meeting held on 8th August 2011, Mr. Dilip Shanghvi (DIN: 00005588), who is also the Managing Director of Sun Pharmaceutical Industries Limited, holds office as the Managing Director of the Company upto 28th February, 2017. The Board of Directors of the Company, in their meeting held on 6th May, 2016 approved the proposal for re-appointment Mr. Shanghvi as the Managing Director of the Company, without any remuneration, for a further period of five years w.e.f. 1st March, 2017.

The members of the company had in their 9th Annual General Meeting held on 31st July, 2014 appointed Prof. Dr. Andrea Vasella (DIN: 01653058), Prof. Dr. Goverdhan Mehta (DIN: 00350615) and Mr. S. Mohanchand Dadha (DIN: 00087414) as Independent Directors of the Company for a term of two years to hold office upto the conclusion of the ensuing 11th Annual General Meeting of the Company. In view of the commendable performance by Prof. Dr. Vasella, Prof. Dr. Mehta and Mr. Dadha during their tenure as Independent Directors of the Company and based on their Performance Evaluation, it is proposed to re-appoint all three of them as Independent Directors of the Company at the ensuing Annual General Meeting of the Company for a further term of one year upto the conclusion of the 12th Annual General Meeting of the Company.

During the year, Mr. Sudhir V Valia (DIN: 00005561), who is also a whole-time Director of Sun Pharmaceutical Industries Limited, was re-appointed as the Chief Financial Officer (CFO) under section 203 of the Companies Act, 2013 and consequentially a Whole-time Director of the Company, without any remuneration, for a further period of two years, to hold office from 1st January, 2016 to 31st December, 2017 without any remuneration.

With effect from 6th May, 2015, Ms. Meetal S Sampat ceased to be the Company Secretary & Compliance Officer of the Company and Mr. Debashis Dey has been appointed in her place.

Appropriate resolutions for the appointment/re-appointment of Directors as detailed above are being placed for your approval at the ensuing Annual General Meeting.

DECLARATION BY INDEPENDENT DIRECTORS

The Company has received declaration from all the Independent Directors of the Company confirming that they meet with the criteria of independence as prescribed under sub-section (6) of Section 149 of the Companies Act, 2013.

POLICY ON DIRECTORS' APPOINTMENT AND REMUNERATION

For the purpose of selection of any Director, the Nomination & Remuneration Committee identifies persons of integrity who possess relevant expertise, experience and leadership qualities required for the position and also takes into consideration recommendation, if any, received from any member of the Board. The Committee also ensures that the incumbent fulfills such other criteria with regard to age and other qualifications as laid down under the Companies Act, 2013 or other applicable laws.

The Board has, on the recommendation of the Nomination & Remuneration Committee framed a policy for selection and appointment of Directors, Senior Management and their remuneration.

A. Research and Development

1. SPECIFIC AREAS IN WHICH R&D IS CARRIED OUT BY THE COMPANY

Sun Pharma Advanced Research Company Ltd (SPARC Ltd) works on innovation and new product development for global markets (US, EU), as well as India and emerging markets.

We develop New Chemical Entities (NCEs) and products based on our proprietary Novel Drug Delivery Systems (NDDS). Our core therapeutic areas of interest include Ophthalmology, Oncology, Central Nervous System (CNS), Dermatology and Respiratory.

Our current business model is to license out our products to potential partner/s that can generate revenue based on upfront, milestone payment and royalty on sales.

New Chemical Entities (NCE)

Inflammation

SUN-597 is a novel corticosteroid with improved safety profile. In pre-clinical models it has shown low potential for skin thinning and other systemic side effects associated with conventionally used topical steroids and has demonstrated better efficacy as compared to low and mid-potency steroids like Triamcinolone. SUN-597 is being developed for treatment of Atopic Dermatitis in US and other major markets. It is also being evaluated for allergic rhinitis and asthma for select emerging markets.

We have filed IND with USFDA.

Anticancer

SUN-K706 is a potent, orally active and highly selective Bcr-Abl Tyrosine Kinase Inhibitor (TKI) being developed for treatment of Chronic Myeloid Leukaemia (CML). In pre-clinical models it has shown to inhibit key Imatinib resistant mutations including T315I mutations.

Safety pharmacology data showed no adverse effects on cardiac, hepatic, renal functions and the planned clinical study will find whether this translates into a benefit in humans. We have filed IND and initiated Phase I studies in USA for SUN-K706.

Novel Drug Delivery Systems (NDDS)

Gastric Retention Systems (GRS)

Wrap Matrix™ Technology

Nanotecton™ Technology

Biodegradable injections/implants

Gel Free Reservoir Technology

Novel device for inhaled drugs

Swollen Micelle Microemulsion (SMM™) technology for ophthalmic formulation

TearAct™ technology for ophthalmic formulation

Abuse Deterrent Technology

Gastric Retention System (GRS)

As we have previously shared with you, an innovative gastro retentive system (GRS) has been devised that allows longer retention in the stomach and improves gastrointestinal absorption of drugs that have a narrow absorption window. SPARC has developed Baclofen GRS once-a-day formulation using this technology for the treatment of spasticity associated with multiple sclerosis. We are recruiting patients under the Phase III trial in USA. Baclofen GRS has already been launched in India.

Wrap Matrix™ Technology

This technology enables developing a multi-layered matrix-based functionally coated tablet which offers controlled release for high dose and high solubility drugs. Once a day dosing can be achieved using this technology.

SPARC has developed Elepsia™ XR (Levetiracetam ER 1000 mg and 1500 mg), an anti-epileptic using the Wrap Matrix™ technology. SPARC received a Complete Response Letter (CRL) from the USFDA rescinding its earlier approval, citing that the compliance status of the manufacturing facility was not acceptable on the date of approval.

SPARC has formulated an extended release once-a-day dosage form of Tizanidine ER with its proprietary Wrap Matrix™ Technology. SPARC is targeting for convenience in dosing and will investigate and study whether the extended release dosage form provides a better side effect profile.

Nanotecton™ Technology

Nanotechnology based delivery systems (Nanotecton™) enables selective delivery of cytotoxic drugs to cancerous tissues. With this technology, drugs are encapsulated within nanoscale carriers derived from biocompatible/ biodegradable polymers and lipids.

Two of our products, PICN and DICN are in clinical trials. PICN named as Bevetex™ has been launched in India and we have also got conditional approval for Taclantis™ as brand name for PICN in USA.

SPARC has completed initial exploratory pilot studies to establish bioequivalence of Taclantis™ with nab-paclitaxel. The data suggests TACLANTIS™ may meet the bioequivalence criteria as defined by USFDA. SPARC therefore is planning to initiate pivotal BE study. The protocol has been finalised and submitted to regulators and ethics committee for approval.

Biodegradable Injections/Implants

SPARC has developed a technology platform of biocompatible and biodegradable micron-sized polymer particles that contains drug molecule in its matrix for long-term systemic delivery of drugs. Depot formulations using biodegradable polymers avoid the requirement of frequent injections of certain drugs in case of ailments such as hormone dependant cancers.

Octreotide LAR has been launched in India.

Gel Free Reservoir (GFR) technology

Gel Free Reservoir technology uses unique polymer ratio that shows synergistic increase in viscosity without the loss of clarity and flow property. It helps to stabilize tear film and retain the active drug for prolonged periods

SPARC has formulated Timolol OD using Gel Free Reservoir (GFR) technology and is launched in India.

Novel device for inhaled drugs

SPARC's Dry Powder Inhaler (DPI) is a pre-metered, 60 doses, breath activated device to administer an inhaled combination of Salmeterol and Fluticasone. This device offers uniform delivery of dose, independent of inspiratory flow rate. The device is small, convenient and easy-to-use and it is compliant with the global regulatory standards.

SPARC has finalised and submitted required pivotal studies protocol to the regulators and ethics committees. We are planning to initiate patient enrolment in Q2 FY 17 and complete the studies in a year's time.

Swollen Micelle Microemulsion (SMM™) technology for ophthalmic formulations

Xelpros™ is a BAK (Benzalkonium Chloride – a preservative which has side effects on eye on long term use) -free Latanoprost eye drops developed with our proprietary Swollen Micelle Microemulsion technology.

SPARC's NDA (New Drug Application) for Xelpros™ is under review with USFDA.

The approval has been delayed pending the cGMP clearance of the manufacturing facility of Sun Pharmaceutical Industries Ltd. (SPIL) - our out - licencing partner.

TearAct™ Technology for ophthalmic formulations

SPARC is developing once-a-day formulation of Brimonidine using proprietary TearAct™ Technology.

Brimonidine is one of the most commonly used drugs for Glaucoma. Brimonidine has to be administered thrice a day, leading to patient compliance issues.

We plan to conduct the Proof of Concept study in Q2 FY 17. We expect to complete this study by the end of FY 17.

Abuse Deterrent Technology

SPARC has developed a platform technology to make a formulation which can deter oral multi-pill abuse. We have filed initial patent for this technology. We have had preIND meetings with USFDA for programs under this platform. We also filed IND for one program and completed initial Proof of Concept studies.

This study has demonstrated viability of our technology and we are now working to optimise formulation so that we can initiate pivotal studies.

2. BENEFITS DERIVED AS A RESULT OF THE ABOVE R&D

SPARC has been working on technology intensive, longer duration projects with uncertain timeframes. SPARC's efforts target the international markets as well as markets like India, and this involves dealing with a number of regulatory agencies. NCEs upon commercialization are expected to provide patients with better treatment options, safer side effect profile, treatments for certain resistant forms or even the possibility of increased dosing compared to conventional treatments for the disorders for which these therapies are being developed.

The new drug delivery systems under development are platform technologies that can be developed for several different drugs. The eventual commercialization of such NDDS products would provide patients with newer dosage forms that are safer, more effective in terms of availability in the body, required in lesser dosage for the same action, or easier for the patient to take, or for the nursing staff to administer. For products such as Abuse Deterrent Formulations, the dosage would be tougher to abuse.

3. FUTURE PLAN OF ACTION—this has been covered with the description of products above. For more information, please also refer to the detailed discussion in the MDA.

INDEPENDENT AUDITOR'S REPORT

TO THE MEMBERS OF

SUN PHARMA ADVANCED RESEARCH COMPANY LIMITED

Report on the Financial Statements

We have audited the accompanying financial statements of **SUN PHARMA ADVANCED RESEARCH COMPANY LIMITED** ("the Company"), which comprise the Balance Sheet as at 31st March 2016, the Statement of Profit and Loss and the Cash Flow Statement for the year then ended, and a summary of the significant accounting policies and other explanatory information.

Management's Responsibility for the Financial Statements

The Company's Board of Directors is responsible for the matters stated in Section 134(5) of the Companies Act, 2013 ("the Act") with respect to the preparation of these financial statements that give a true and fair view of the financial position, financial performance and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the Accounting Standards prescribed under section 133 of the Act.

This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit.

We have taken into account the provisions of the Act, the accounting and auditing standards and matters which are required to be included in the audit report under the provisions of the Act and the Rules made thereunder and the Order under section 143 (11) of the Act.

We conducted our audit of the financial statements in accordance with the Standards on Auditing specified under Section 143(10) of the Act. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and the disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal financial control relevant to the Company's preparation of the financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances. An audit also includes evaluating the appropriateness of the accounting policies used and the reasonableness of the accounting estimates made by the Company's Directors, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the financial statements.

Opinion

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid financial statements give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the Company as at 31st March 2016, and its loss and its cash flows for the year ended on that date.

Report on Other Legal and Regulatory Requirements

1. As required by Section 143 (3) of the Act, we report that:
 - a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.
 - b) In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books.
 - c) The Balance Sheet, the Statement of Profit and Loss, and the Cash Flow Statement dealt with by this Report are in agreement with the books of account.

- d) In our opinion, the aforesaid financial statements comply with the Accounting Standards prescribed under section 133 of the Act, as applicable.
- e) On the basis of the written representations received from the directors as on 31st March 2016 taken on record by the Board of Directors, none of the directors is disqualified as on 31st March 2016 from being appointed as a director in terms of Section 164 (2) of the Act.
- f) With respect to the adequacy of the internal financial controls over financial reporting of the Company and the operating effectiveness of such controls, refer to our separate Report in "Annexure A". Our report expresses an unmodified opinion on the adequacy and operating effectiveness of the Company's internal financial controls over financial reporting.
- g) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us:
- i. The financial statements disclose the impact of pending litigations on the financial position of the Company - Refer Notes 24(i) (b) and (c) to the financial statements;
 - ii. The Company did not have any long-term contracts including derivative contracts for which there were any material foreseeable losses;
 - iii. There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company.
2. As required by the Companies (Auditor's Report) Order, 2016 ("the Order") issued by the Central Government in terms of Section 143(11) of the Act, we give in "Annexure B" a statement on the matters specified in paragraphs 3 and 4 of the Order.

ANNEXURE "A" TO THE INDEPENDENT AUDITOR'S REPORT **(Referred to in paragraph 1(f) under 'Report on Other Legal and Regulatory Requirements' of our report of even date)**

Report on the Internal Financial Controls Over Financial Reporting under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of **SUN PHARMA ADVANCED RESEARCH COMPANY LIMITED** ("the Company") as of 31st March 2016 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting ("the Guidance Note") issued by the Institute of Chartered Accountants of India ("the ICAI"). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

Auditor's Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note issued by the ICAI and the Standards on Auditing prescribed under Section 143(10) of the Act, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls Over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls,

material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, to the best of our information and according to the explanations given to us, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31st March

2016, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note issued by the ICAI.

ii Use of Estimates

The preparation of financial statements in conformity with the Generally Accepted Accounting Principles in India requires estimates and assumptions to be made that affect the reported amount of assets and liabilities and disclosure of contingent liabilities on the date of the financial statements and the reported amount of revenues and expenses during the reporting period. Difference between the actual result and estimates are recognised in the period in which the results are known / materialised.

iii Fixed Assets and Depreciation (Tangible Assets)

Fixed Assets are stated at historical cost less accumulated depreciation thereon and impairment losses, if any. Depreciable amount for assets is the cost of an asset, or other amount substituted for cost, less its estimated residual value. Depreciation on fixed assets has been provided on the Straight Line Method as per the useful life prescribed in Schedule II to the Companies Act, 2013. Assets costing ₹ 5,000/- or less are charged off as expense in the year of purchase. The cost of fixed assets comprises its purchase price net of any trade discounts and rebates, any import duties and other taxes (other than those subsequently recoverable from the tax authorities), any directly attributable expenditure on making the asset ready for its intended use, other incidental expenses and interest on borrowings attributable to acquisition of qualifying fixed assets up to the date the asset is ready for its intended use.

iv Leases

Lease arrangements where risk and rewards incidental to ownership of the asset substantially vest with lessor are recognised as operating lease. Lease rental for assets taken on operating lease are recognised in the Statement of Profit and Loss on a straight line basis over the period of lease.

v Research and Development Cost

The research and development cost is accounted in accordance with Accounting Standard – 26 'Intangible Assets'. All related revenue expenditure incurred on original and planned investigation undertaken with the prospect of gaining new scientific or technical knowledge and understanding up to the time when it is possible to demonstrate probable future economic benefits, is recognised as research expenses and charged off to the Statement of Profit and Loss, as incurred. All subsequent expenditure incurred for product development on the application of research findings or other knowledge upon demonstration of probability of future economic benefits, prior to the commencement of production, to the extent identifiable and possible to segregate are accumulated and carried forward as development expenditure under Intangible assets under development, to be capitalised as an intangible asset on completion of the project. In case a project does not proceed as per expectations / plans, the same is abandoned and the amount classified as development expenditure under Intangible assets under development is charged off to the Statement of Profit and Loss.

vi Revenue Recognition

Sale of Technology / Know-how (rights, licenses and other intangibles) are recognised when performance obligation is completed or where risk and rewards of ownership of the products are passed on to the customers, which is generally as per agreement. License Fees / Royalty Income is recognised on accrual basis as per relevant agreement. Sales are stated net of returns, VAT/ Sales Tax, Service tax if any.

vii Investments

Investments are classified into Current and Long-term Investments. Current Investments are valued at lower of cost and fair value. Long-term Investments are stated at cost less provision, if any, for other than temporary diminution in the value of such investments.

NOTES FORMING PART OF THE FINANCIAL STATEMENTS

for the year ended 31st March, 2016

viii Foreign Currency Transactions and Translation

Initial recognition

Transactions in foreign currencies entered into by the Company are accounted at the exchange rate prevailing on the date of the transaction or at rate that closely approximate the rate at the date of the transaction.

Measurement at the balance sheet date

Foreign currency monetary items (other than derivative contracts) of the Company, outstanding at the balance sheet date are restated at the year-end rates. Non-monetary items of the Company are carried at historical cost.

Accounting for forward contracts

Premium / discount on forward exchange contracts, which are not intended for trading or speculation purposes, are amortised over the period of the contracts if such contracts relate to monetary items as at the balance sheet date. Any profit or loss arising on cancellation or renewal of such a forward exchange contract is recognised as income or as expense in the period in which such cancellation or renewal is made.

ix Derivative Contracts

Derivative contracts in the nature of currency forward contracts with an intention to hedge existing assets and liabilities are accounted as per the policy stated for Foreign currency transactions and translation.

All other derivative contracts entered into for hedging the future foreign currency fluctuation risk are accounted for on the principles of prudence as enunciated in Accounting Standard 1. Pursuant to this, losses if any on mark to market basis are recognised in Statement of Profit and Loss.

x Government Grants / Subsidies

Government grants are accounted when there is reasonable assurance that the Company will comply with the conditions attached to them and it is reasonably certain that the ultimate collection will be made. Capital subsidy in nature of Government Grants related to specific fixed assets is accounted for where collection is reasonably certain and the same is shown as a deduction from the gross value of the asset concerned in arriving at its book value and accordingly the depreciation is provided on the reduced book value.

xi Taxes on Income

Tax expenses comprises of Current tax and Deferred tax. Current Tax provision, if any, has been made on the basis of reliefs and deductions available under the Income Tax Act, 1961. Minimum Alternate Tax (MAT) credit entitlement available under the Income Tax Act, 1961 is recognised to the extent that there is convincing evidence that the Company will pay normal income tax during the specified future period. The Company reviews the carrying amount of MAT credit entitlement at each balance sheet date and writes down the carrying amount to the extent there is no longer convincing evidence that Company will pay normal income tax during the specified future period. Deferred tax resulting from "timing differences" between taxable and accounting income that originate in one period and are capable of being reversed in one or more subsequent period is accounted for using the tax rates and laws that are enacted or substantively enacted as on the Balance Sheet date. The deferred tax asset is recognised and carried forward only to the extent that there is a reasonable certainty that the assets can be realised in future. However, where there is unabsorbed capital expenditure or carry forward losses under taxation laws, deferred tax assets are recognized only if there is virtual certainty of realisation of such assets. Deferred tax assets are reviewed as at each Balance Sheet date.

xii Employee Benefits

Employee benefits include provident fund, employee state insurance scheme, gratuity and compensated absences

Defined contribution plans

The Company's contribution to provident fund and employee state insurance scheme are considered as defined contribution plans and are charged as an expense based on the amount of contribution required to be made and when services are rendered by the employees

NOTES FORMING PART OF THE FINANCIAL STATEMENTS

for the year ended 31st March, 2016

Long-term employee benefits

Compensated absences which are not expected to occur within twelve months after the end of the period in which the employee renders the related service are recognised as a liability at the present value of the defined benefit obligation as at the balance sheet date ascertained on actuarial basis by an independent valuer and provided as per Company's rules.

Short-term employee benefits

The undiscounted amount of short-term employee benefits expected to be paid in exchange for the services rendered by employees are recognised during the year when the employees render the service. These benefits include performance incentive and compensated absences which are expected to occur within twelve months after the end of the period in which the employee renders the related service.

Gratuity

With respect to gratuity liability, Company contributes to LIC under Employee Group Gratuity Scheme. The cost of providing benefits is determined using the Projected Unit Credit method, with actuarial valuations being carried out at each balance sheet date. Actuarial gains and losses are recognised in the Statement of Profit and Loss in the period in which they occur. Past service cost is recognised immediately to the extent that the benefits are already vested and otherwise is amortised on a straight-line basis over the average period until the benefits become vested.

xiii Provisions, Contingent Liabilities and Contingent Assets

Provisions are recognised only when there is a present obligation as a result of past events and when a reliable estimate of the amount of the obligation can be made. Contingent liability is disclosed for (i) Possible obligations which will be confirmed only by uncertain future events not wholly within the control of the Company or (ii) Present obligations arising from past events where it is not probable that an outflow of resources will be required to settle the obligation or a reliable estimate of the amount of the obligation cannot be made. Contingent Assets are not recognised in the financial statements.

xiv Impairment of Assets

The Company assesses at each Balance Sheet date whether there is any indication that an asset may be impaired. If any such indication exists, the Company estimates the recoverable amount of the asset. If such recoverable amount of the asset or the recoverable amount of the cash generating unit to which the asset belongs is less than its carrying amount, the carrying amount is reduced to its recoverable amount. The reduction is treated as an impairment loss and is recognised in the Statement of Profit and Loss. If at the Balance Sheet date there is an indication that a previously assessed impairment loss no longer exists, the recoverable amount is reassessed and the asset is reflected at the lower of recoverable amount and the carrying amount that would have been determined had no impairment loss been recognised.

xv Share Issue Expenses

Expenses incurred in connection with issue of shares is accumulated and amortised over a period of 5 years from the year of issue of shares.

xvi Operating Cycle

Based on the nature of products / activities of the Company and the normal time between acquisition of assets and their realisation in cash or cash equivalents, the Company has determined its operating cycle as twelve months for the purpose of classification of its assets and liabilities as current and non-current.

PRINCIPLE 1 – ETHICS, TRANSPARENCY AND ACCOUNTABILITY

Sustainable growth stems from good governance. SPARC's journey of discovery is steered by integrity, transparency and accountability. Be it respecting regulations or embedding consistent value systems, ethical conduct is the backbone of all facets of the company's operations. This 'research with responsibility' approach results in reinforced stakeholder trust and ensures long-term value for all stakeholders. Some of the enablers of good governance include:

Leadership

Our Board of Directors lead by example and guide the company on the path of progress through innovation, fair practices and compliance. A mechanism is in place to set forth policies and review its adherence by the Directors and the employees.

Code of Conduct

Our Code sets forth legal and ethical standards of conduct for all Directors and employees. The aim is to deter wrongdoing and promote practices like:

- Ethical handling of conflicts of interest between personal and professional relationships
- Protection and proper use of corporate assets & confidential Information
- Compliance with governmental laws, rules and regulations
- Prompt internal reporting of violations to an appropriate person

Safeguarding Governance

A whistle blower policy has been formulated to encourage and enable all employees to flag off any potential infractions of the Code of Conduct of the Company, breaches of copyright or patent and alike. In the financial year, no violations were reported.

PRINCIPLE 2 – PRODUCT LIFE CYCLE SUSTAINABILITY

Our approach is to leverage the power of science to make people happy and healthy as well as help the planet breathe easy.

We press into action latest science and delivery technologies to explore unreached territories in therapeutic areas. The objective is to cater to the unmet or inadequately-met patient needs. Be it finding an anticancer drug that targets tumour cells or discovering a glaucoma medicine that needs to be instilled only once a day. In doing this, we take care that our practices are sustainable and our processes have a lighter footprint.

A perfect example is SPARC's novel self-dispersing Nanoparticle technology. Water insoluble anticancers have two issues. Firstly, toxic surfactants often have to be used to solubilise the drug. Secondly, such drugs not only reach the tumour tissues, but also reach and penetrate healthy tissues in the body. Our novel self-dispersing Nanoparticle technology platform addresses these challenges with higher drug localisation into the cancer cells, avoiding use of toxic surfactant and the ability to deliver a higher dose.

Our Swollen Micelle Microemulsion (SMM) technology is for solubilising ophthalmic drugs with limited water solubility or completely insoluble ophthalmic drugs. SMM is a Benzalkonium Chloride (BAK)-free solubilising technology, which eliminates use of toxic BAK known to damage ocular surface on chronic use.

Wrap Matrix TM Technology is a novel oral controlled drug delivery system based on pre-defined, precise and selective surface exposure. The technology provides convenience to the patients by reducing the overall pill burden. At the same time, it has a high drug to excipient ratio ensuring that the size of the tablet is reduced, thereby helping patients to easily swallow the tablet.

Note: As SPARC is an R&D facility, most aspects of product life cycle management are not applicable to our business.

PRINCIPLE 3 – EMPLOYEE WELL-BEING

Employees are the key assets of any organisation, more so in an innovation driven business like ours. Pharma research calls for extensive domain knowledge, technical skills of a high calibre, and passion to make life better.

At SPARC, we nurture the ingenuity of our 250+ scientists by building capabilities, and encouraging them with the right opportunities and the right environment for innovation. We constantly align our HR processes with changing business dynamics and ensure employees well-being by:

- Designing research laboratories and processes with adequate safeguards to ensure operational safety and healthy work environment
- Creating a culture of continuous learning among all our employees.

In the financial year, we invested more than 5,000 hours of learning and developmental activities, taking into fold 58% permanent employees including 39% permanent women employees

- Promoting equality of opportunity and encouraging freedom of communication

We are a close-knit family and regularly engage with our employees to manage their needs and expectations. This is the reason, why our employees have never felt the need to form an employee association.

- Motivating employees with recognition & recreation avenues

Employee Strength

Total number of employees	356
Employees hired on temporary/contractual/casual basis	86
Permanent women employees	74

PRINCIPLE 4 – STAKEHOLDER ENGAGEMENT

We are committed to engage with each stakeholder segment with an aim to consistently align our organisational strategies with our stakeholders' priorities. We pursue this objective by identifying, analysing and addressing their evolving needs, concerns and expectations, including divergent and marginal interests.

The implementation of our Stakeholder Policy is done with integrity, maintaining high standards of transparency and accountability.

The ambit of accountability moves beyond just the customers and investors. We have thus identified all our key stakeholders, internal as well as external:

Employees | Communities | Patients | Healthcare Professionals | Payers, Investors & Shareholders | Regulatory Authorities

We strive to involve each one of them into our decision-making process.

While our company website, annual reports, investor presentations and annual general meetings continue to be our primary source of engagement, we will strive to find new ways to communicate with a broader stakeholder base.

PRINCIPLE 5 – HUMAN RIGHTS

Respecting the dignity of every individual is a moral imperative. At SPARC, we uphold the fundamental rights of a person not just within our organisation, but across our sphere of influence.

We adhere to the following imperatives in letter and spirit:

- Ensure the right to fair wages, freedom of association and collective bargaining
- Open grievance redressal mechanisms to deal with stakeholder concerns on human rights
- Avail a safe working environment, free of discrimination and harassment.
- Strictly condemn child labour, forced labour or any form of involuntary labour; paid or unpaid

In FY 2015-16, we did not receive any complaint from any stakeholder pertaining to human rights violation.

PRINCIPLE 6 – ENVIRONMENT

Natural resource deficiency poses a direct implication on human health. We must mind our action to borrow the least from the Mother Earth. Fortunately, the nature of our business allows us to create more possibilities out of less resources. We are committed to amplify this inherent strength of business by introducing the principles of green chemistry in our laboratory.

Since we are not associated in manufacturing, the potential environmental risks are limited. Still, we have identified possible environmental risks and effective preventive steps as well as actions to be taken, have been implemented.

We comply with all the environmental laws of the land by ensuring resource conservation, use of improved technologies, green processes and continual improvements.

One such initiative is the Company's 'Go Green' initiative, wherein we encourage investors to accept our documents, including Notice of General Meetings and Annual Report, in electronic form instead of physical mode. This has enabled us to save paper and indirectly, trees. Our emissions and waste generation status is well within the permissible limits and we did not receive any notice from CPCB/SPCB in the financial year.

With a view to do our bit, we also have instituted our environment policy.

PRINCIPLE 7 – POLICY ADVOCACY

At heart, SPARC champions the cause of driving effective healthcare via innovation. We collaborate with trade and industry associations, and are members of Indian Merchants Chambers.

PRINCIPLE 8 – INCLUSIVE GROWTH

Any development which is not equitable, will not last long. For the growth to be sustained, it has to be inclusive. At SPARC, we are cognisant of this fact and hence a comprehensive CSR Policy is in place.

Since the average net profit of the Company during the three immediately preceding financial years was negative, we could not invest on CSR activities during the previous year. However, we plan to implement welfare programmes in the future that can usher in sustainable development of the community at large.

PRINCIPLE 9 – CUSTOMER VALUE

We engage with our customers on an on-going basis and maintain clarity in our offerings.

Although we are not required to deal with the end consumers being in the business of innovation, we assume our responsibility towards the patients. Improving the health quotient of the people around the world is our end objective and we pursue it with zealous rigour. Towards this, we have formulated a customer centricity policy stressing on the following principles:

- Focus on patient health, safety and satisfaction at all times
- Follow a sustainable product development cycle which is not just socially responsible, but also ethically robust
- Listen to customers' concerns and address them in a responsive manner

In the financial year, no customer complaint was reported.
