Innovating
through
the lens of **life**

A simple design with a world of a meaning within. It uses an age-old symbol 'the Venn diagram' and brings out essence of our existence.

The logo shows us, Sun, represented by the yellow circle overlapping something bigger and grander - life, represented by the orange circle and making us an inseparable whole.

The key foundational pillars of the future we seek to create are Innovation, Integrity, Efficiency and Human Centricity, and these come alive in an abstraction which we call the "Lens of Life" - our differentiating focus through which we look at R&D to uncover possibilities for better health.

Management Discussion And Analysis

GLOBAL LIFE SCIENCES INDUSTRY TRENDS

The research based drug development enterprise is at crossroads. Improved understanding of disease biology, emergence of novel targets, availability of cutting-edge drug discovery technologies and data analytic tools have created significant opportunities to develop newer drugs faster. The demand for newer therapies to address unmet medical needs continues to remain high because of increasing aging population and prevalence of chronic diseases.

On the other hand, the industry is facing challenges caused by slower sales growth, pricing controls & changing reimbursement environment, expiring patents, shorter

product life cycles and tighter regulations. These concerns, however, have been mitigated to some extent with successful drug approvals reaching record highs over the past few years.

The complexities of the industry are not deterring the new entrants. Almost 750 new drug discovery companies were reported over the past twelve months¹. The number of products in active development by the pharma and biotech industries rose to an all-time high in January 2017. New data shows that there were 14,872 pipeline projects in development in January 2017, an increase of 8.4% on the corresponding figure from 2016¹.

Pharmaceutical R&D Spend and Sales

In spite of the challenging environment, pharmaceutical R&D spend and sales are expected to have a healthy growth trend. The worldwide R&D spending on pharmaceuticals is expected to grow at a CAGR of 2.8% from USD 149.8 billion in 2015

to USD 182.0 billion by 2022, faster than the CAGR growth of 1.7% achieved during 2008-15².

The worldwide pharmaceutical sales are likely to grow at a CAGR of 4.4% to USD 1.2 trillion during 2016-20², driven by growing acceptance of high-priced innovative orphan drugs and ongoing industry consolidation.

2. Adapted from 2017, Global Life Sciences Outlook, Deloitte

Worldwide Pharmaceutical Sales, 2011-20²

India and Indonesia are expected to be the Asia & Australasia region’s fastest-growing countries in pharma sales from 2016 - 20, at 13.0% and 11.0% CAGR respectively, due to the rising incidence of chronic diseases and increasing demand from the growing middle class for more advanced medicines².

Although the growth and evolution of the pharma industry correlates mostly with healthcare costs and spending, some of the following trends may also contribute to the growth.

Technological advancements

Till date, finding gaps in healthcare is a tedious task, and many providers face challenges in identifying them. Clinical data analysis has helped providers to plan carefully, set benchmarks and monitor their performance.

Lately, there have been several developments in technologies, such as artificial intelligence, virtual reality and wearable technologies, that have not only been disruptive but also have the potential to change the face of healthcare and transform the vision of population health management.

Reorientations in pharmaceutical industry

There have been many regulatory and reimbursement changes for pharmaceutical companies lately. In times like these, pharmaceutical companies are aiming towards engaging patients to ensure that they are providing the best possible value, combined with sharing of information among themselves and with the patients.

Increased partnerships and collaborations

2016 was dotted with news of partnerships and collaborations in healthcare, presenting the importance of working together to survive the shift to value-based reimbursement. 2017 may witness a growth in partnerships, along with joint ventures, mergers, acquisitions, strategic alliances and clinical affiliations.

New trends in clinical innovation

With the significant rise in costs of R&D activities in traditional markets like the US (accounting for nearly 70-80% of the global life sciences R&D funding) and the European

“*India and Indonesia are expected to be the Asia & Australasia region’s fastest-growing countries in pharma sales from 2016 to 2020, at 13.0% and 11.0% CAGR respectively²*”

Union, the industry is increasingly shifting these activities to low cost destinations, especially in Asia.

Regulatory compliance and drive for homogenisation

The regulatory scenario for the pharmaceutical companies is the most stringent and undergoes continuous evolution. As a result, the companies will have to constantly evolve strategies, actions and operations to meet norms. Besides, different countries have their own quality and safety standards leading to delays in launching drugs. To counter this, the regulators are increasingly focussing on homogenisation of compliance norms across all markets for the benefit of the masses.

Achieving higher value with lower costs

Value in healthcare is all about creating

and delivering quality, while keeping costs in check and almost every value-focussed agency in healthcare is working towards that goal.

Whether value-based care is being achieved through an analytics-driven approach, new payment models, or changes in federal regulations, the ultimate goal is to provide higher quality at lower cost, making use of robust infrastructure and complete clinical skills to provide healthcare services.

Industry is charging headlong into the future, marching towards a new, ever more rapidly changing world. Healthcare companies need to adapt to these changes and ideally anticipate them, so as to drive towards value in innovative ways and setting them to master upcoming changes.

“
Industry is charging headlong into the future, marching towards a new, ever more rapidly changing world. Healthcare companies need to adapt to these changes and ideally anticipate them, so as to drive towards value in innovative ways and setting them to master upcoming changes.

INDUSTRY OUTLOOK

The year 2017 is expected to be an exciting yet challenging one for the worldwide pharmaceutical industry.

Even as aging population and proliferating chronic diseases drive increased provider and patient demands for more and better therapies, reform-driven drug price controls and government cost-containment measures continue to challenge the life sciences sector. Besides, the shift from volume to value developments of new therapies and proliferation of orphan drug approvals, may spawn debates regarding prices and access to medicine. With public and private payers making increased use of value-based pricing and real-world evidence to provide clinical and commercial insights into the value of products, life sciences companies should balance the pursuit of clinical innovation with improving operational and cost efficiencies.

The industry would be required to win back public and political trust relating to drug pricing, exploitation of market monopolies, and promotional practices. The focus of the industry will be required to effectively shift towards patient-centricity.

OPERATIONS REVIEW

Your Company earned net revenues of ₹ 19,465 lakhs. Our source of revenue largely includes royalty and milestone income for the products previously licensed to partner(s).

We did not receive approval of Xelpros™ and Elepsia™ XR due to GMP compliance issues at our partner's manufacturing site.

Our milestone and royalty income linked to approval and commercialisation of these products is deferred as a result of delay in approvals.

Since our products are not yet commercialised in major markets like US, we do not have a steady stream of royalty income. Our income therefore is irregular and depends on the milestone payments that we might receive at the time of licensing. We expect this trend to continue in the next year as well.

Your Company reported net loss of ₹ 12,027 lakhs. The major expenses were attributed to the conduct of clinical trials associated with our R&D programmes and towards employee costs. During the year, we initiated several clinical trials and also accelerated patient enrolment in ongoing clinical trials. This resulted in significant increase in clinical trial expenses compared to previous year.

In the year ahead, we anticipate increase in our clinical trials spending and investment in building critical developmental capabilities. We have initiated pivotal and Proof of Concept clinical trials for several of our programmes. We are also building our capabilities and increasing our efforts on hiring key resources to assist us in taking the organisation to the next level.

Drug discovery research is a high risk business. Your Company has identified potential risks associated with the business and has developed a risk management plan to insulate the organisation from the potential impact of such risks.

THE YEAR 2016 - 17: CROSSING CRITICAL MILESTONES

The year 2016-17 was an exciting year for SPARC. We crossed several milestones for the programmes in clinical development. We completed the patient recruitment in pivotal efficacy studies of Baclofen GRS and Salmeterol - Fluticasone Dry Powder Inhaler (DPI) and initiated pivotal BE study of Taclantis™ (PICN). We completed part A of Phase I study of SUN-K0706 in healthy volunteers and initiated crucial part B study in patients suffering from refractory Chronic Myeloid Leukemia (CML). We completed Proof of Concept study for SDN-021, Tizanidine ER and initiated Phase 2 study for Brimonidine OD.

We made significant progress on interactions and submissions with USFDA during last year. We completed 5 pre-IND consultations with USFDA for our early assets to obtain guidance for development and registration of these programmes in USA. We also filed IND with USFDA for SUN-K0706 to initiate clinical trial in patients with Parkinson's disease. We had several interactions for our programmes with other regulatory agencies during the year.

Continuing our focus and efforts on partnerships and collaborations, we signed agreements with three Universities in

USA, for pursuing collaborative research for our existing programmes and new programmes.

We licensed Elepsia™ XR to a subsidiary of Sun Pharmaceutical Industries Ltd. for US market and received upfront payment of USD 10 million. This is a significant milestone and validation of the value that our research programmes can deliver. During the year, we could not realise additional royalty revenues and milestone payments associated with Xelpros™ and Elepsia™ XR commercialisation because of the delay in approval of these products by USFDA on account of the compliance issues at the manufacturing site of our partner.

To mitigate the risk of further delay, we are

now working towards manufacturing both these products at alternate sites.

The delay in realising our revenue and our increasing spend on clinical trials has resulted in increased cash burn during FY17. We expect this to continue in FY18. We will evaluate our requirement of funds to support the clinical studies in the short term and explore options to raise funds.

Our other clinical programmes are progressing as planned. We are expecting results from the pivotal studies of DPI and Baclofen GRS during FY18. Data from Taclantis™ may also be available by Q1FY19. Positive outcomes of these pivotal studies may provide us a significant revenue opportunity in next 12 to 24 months.

“ We signed agreements with three Universities in USA, for pursuing collaborative research for our existing programmes and new programmes.

We have reorganised our early stage portfolio of programmes and focus on therapy areas over the last couple of years. We now have a balanced portfolio of NCEs and NDDS programmes with focus on select types of cancers, inflammation, neurodegenerative diseases and developing abuse deterrent formulations. Some of our programmes in early development will enter in clinical trials during FY18.

While a lot of momentum has been dedicated to advance our programs to the next phase of development, we have added significant resources and are planning to evaluate new R&D facility options to accommodate capacity growth.

During the year, we worked to create a new SPARC logo which captures the essence of our identity and purpose, marking another key milestone in our evolution.

Our new logo combines continuity and change by embracing our roots proudly, while expressing our aspiration and innovative soul through a powerful, modern composition. The key foundational pillars of the future we seek to create are Innovation, Integrity, Efficiency and Human Centricity, and these come alive in an abstraction we call the "Lens of Life". Lens of Life craftily brings together our heritage (Sun) and the object of our pursuit (Life itself) in a bright visual statement which captures our very purpose - innovations inspired by life.

In a nutshell, your Company took major strides during the year 2016-17 and set the stage for a leap forward in future with additional revenue generating opportunities in a short-to-medium timeframe.

UPDATE ON KEY PROGRAMMES

Xelpros™ Eye drops for Glaucoma

Xelpros™, our BAK free Latanoprost eye drops for Glaucoma, is under review with the USFDA for approval. The approval is delayed due to our partner's manufacturing site compliance issue. To mitigate the risk of further delay, we are in the process of transferring manufacturing to an alternate facility.

Elepsia™ XR Once-a-day tablets for Epilepsy

Elepsia™ XR is our novel once-a-day formulation of Levetiracetam for epilepsy. Elepsia™ XR has also been filed with USFDA for approval and the approval is delayed due to non-compliance of our partner's manufacturing facility.

We licensed Elepsia™ XR to a subsidiary of Sun Pharmaceutical Industries Ltd. for the US market and received USD 10 million as upfront payment. SPARC is eligible for additional milestone payments and royalty payments linked to future sales of Elepsia™ XR.

We are actively engaged with our manufacturing partner on the progress of the compliance status of the manufacturing facility and have also initiated steps for transfer of manufacturing at an alternate site to mitigate the risk of further delay in approval.

We now have a balanced portfolio of NCEs and NDDS programmes with focus on select types of cancers, inflammation, neurodegenerative diseases and developing abuse deterrent formulations.

Baclofen GRS Once-a-day capsules for Spasticity in Multiple Sclerosis

Baclofen GRS is a novel once-a-day formulation of Baclofen, based on SPARC's Gastro Retentive Innovative Device (GRID) Technology. SPARC's GRID Technology retains Baclofen in the stomach for an extended period of time and thus makes it a truly once-a-day formulation.

We intensified our efforts to recruit patients on our pivotal clinical studies. Patient recruitment has been completed in the pivotal Phase 3 efficacy and safety trials. We are on track to file the NDA for this product by the end of FY18.

We have initiated efforts for out-licensing of Baclofen GRS. We believe that Baclofen GRS presents a good revenue generation opportunity for SPARC, as it will be the first and only once-a-day Baclofen product in the USA.

Taclantis™ (Paclitaxel Injection Concentrate for Nanodispersion) for Solid Tumours

Taclantis™ is a Cremophor® and Albumin-free nano particle formulation of the cytotoxic drug Paclitaxel. It is developed using SPARC's proprietary Nanotecton™ Technology. Taclantis™ offers ease of reconstitution & administration, short infusion time and reduced risk of allergic side effects.

SPARC completed the pilot BE study and the data suggested that Taclantis™ has a PK profile similar to that of Abraxane®. Based on the outcome of the pilot BE study, we have initiated a pivotal BE study of Taclantis™.

We are expecting to complete the study by Q1FY19.

Salmeterol - Fluticasone Dry Powder Inhaler (DPI) for Asthma and COPD

SPARC's DPI is a pre-metered, 60 doses, breath activated device to administer an inhaled combination of Salmeterol and Fluticasone. SPARC's DPI uses half the dose of Salmeterol and Fluticasone as compared to Advair®/Seretide®.

SPARC has completed enrolment in the pivotal studies required for marketing authorisation based on the guidance received from regulatory agencies in Europe. We expect to receive final data in early FY18 and if the data are positive, we shall initiate the NDA filing in European countries.

SUN – K0706 for Chronic Myeloid Leukemia

SUN – K0706 is a novel and highly selective Bcr-Abl kinase inhibitor, being developed for treatment resistant Chronic Myelogenous Leukemia (CML). SUN – K0706 is a potent inhibitor of Bcr-Abl and its mutant forms, including the T315I mutant.

We successfully completed part A of the Phase 1 study in healthy volunteers in USA and have established oral bioavailability of the drug.

We have initiated part B of the Phase 1 dose range finding study in CML patients. We plan to complete the study in a year's time. This study will help us to establish a safe human dose to conduct pivotal efficacy study in patients.

Brimonidine OD **Eye drops for Glaucoma**

SPARC is developing a once-a-day formulation of Brimonidine eye drops for Glaucoma using its proprietary TearAct™ Technology. The currently marketed product requires patients to be dosed three times a day, which poses treatment compliance challenges.

SPARC initiated Phase 2 Proof of Concept study in 140 Glaucoma patients in Europe. The study is ongoing and fully recruited. Topline results are expected in Q2 FY18.

Tizanidine ER **Once-a-day tablets for Musculo-Skeletal Pain**

Tizanidine, currently available as immediate release tablets and capsules, has a short half-life and hence needs to be taken several times in a day. It is also associated with side effects, particularly dizziness and somnolence, which limits its dose and overall use.

SPARC has formulated extended release once-a-day tablets of Tizanidine. The formulation is expected to reduce the dose limiting side effects of Tizanidine and also improve patient compliance.

SPARC completed driving simulation study of Tizanidine ER and the results suggest that our formulation is less sedating as compared to immediate release Tizanidine tablets. We are working on clinical development strategy for this product.

Minocycline Topical for Acne

SPARC has formulated a novel topical Minocycline formulation for the treatment of Acne.

Minocycline is currently approved for treatment for Acne as oral tablets. However, oral Minocycline is associated with several systemic side effects. A topical formulation is expected to be free from such systemic side effects and provide better bioavailability at the site of action.

We have optimised the formulation and we plan to conduct IND enabling toxicological studies.

SUN – 597 Topical for Atopic Dermatitis and Psoriasis

SPARC has developed a topical formulation of its novel soft corticosteroid SUN – 597 for steroid responsive dermatoses. SUN – 597 has demonstrated preclinical efficacy in Psoriasis model. It also demonstrated low potential for skin thinning in animal studies.

SPARC completed required toxicology studies. We plan to initiate a Proof of Concept study in Psoriasis patients in Q2FY18.

SDN – 021 for Pain

SPARC is working on a Novel Delivery Platform to address the escalating problem of prescription drug abuse. It is estimated that every day in the USA, 46 people die of prescription painkillers overdose³. These deaths have more than quadrupled in the past decade and a half. Today, more people die from prescription opioid overdose than from heroin, cocaine and all other

illegal drugs combined, an alarming trend that led the U.S. Centers for Disease Control to declare it an epidemic in November 2011.

SPARC has developed a platform technology to make a formulation, which can deter oral multi-pill abuse. We have filed patents for this technology.

We completed pilot PK study in healthy volunteers. The results of this study are encouraging and support the Proof of Concept of oral multi-pill abuse deterrence.

We plan to discuss the data with USFDA and seek their guidance on studies required for approval.

“ We completed pilot PK study in healthy volunteers. The results of this study are encouraging and support the Proof of Concept of oral multi-pill abuse deterrence.

OUTLOOK

While we progress through the challenging times of uncertainties for approval of 2 products filed with USFDA, our other clinical programmes are rapidly advancing, resulting in a visible increase in cash burn. The silver line is that we have completed patient enrolment in pivotal studies of Baclofen GRS and DPI and have initiated a pivotal study for Taclantis™. If the outcome of these clinical trials are positive, we would have additional cash flow opportunities in the next 12 to 24 months.

We are aggressively replenishing our early stage pipeline as some of our promising early stage assets would transition to the clinical stage. Our early stage portfolio is now a balanced mix of delivery system innovations with medium term timelines for development and new chemical entities addressing the next generation of opportunities in known and validated biological pathways and a small set of opportunities addressing novel targets. Oncology, Neurodegeneration, Inflammation and Pain remain our therapeutic areas of focus.

HUMAN RESOURCE STRATEGY

The human resource strategy of the Company is focussed on attracting the best talent, while providing growth and learning opportunities to its employees. The HR processes are continuously evolving and aligning with the changing business requirements to create a culture of continuous learning and innovation among our employees. As on 31st March, 2017, the Company had a dedicated team of 398 people, of which close to 330 are scientists. With an aim of creating a culture of continuous

learning among all our employees, the Company invested ~5000 hours in learning and developmental activities during the financial year.

RISKS AND CONCERNS

Innovative research is a high risk area, and we have consciously tried to take on manageable risks through our process of project selection and by simultaneously working on projects with different delivery timeframes and risk profile. But there is high likelihood that an investment may have to be abandoned if a project is dropped or changed in subsequent stages of research. A project may need longer time, or may need additional tests or costs that may not have been initially anticipated. We may or may not find a licensing partner to work with, in order to bring the product to market. A competing technology or product might limit the potential for our NCE or NDDS programmes.

INTERNAL CONTROL SYSTEMS AND THEIR ADEQUACY

SPARC has in place a well-defined organisational structure and adequate internal controls for efficient operations. The Company has in place internal policies and is cognizant of applicable laws and regulations, particularly those related to the protection of intellectual properties, resources, assets and accurate reporting of the financial transactions. The Company upgrades these systems on a regular basis. The internal control systems are supplemented by extensive internal audits, conducted by an independent firm of chartered accountants.

“

We have completed patient enrolment in pivotal studies of Baclofen GRS and DPI and have initiated a pivotal study for Taclantis™. If the outcome of these clinical trials are positive, we would have additional cash flow opportunities in the next 12 to 24 months.

DECLARATION BY INDEPENDENT DIRECTORS

The Company has received declaration from all the Independent Directors of the Company confirming that they meet with the criteria of independence as prescribed under sub-section (6) of Section 149 of the Companies Act, 2013.

POLICY ON DIRECTORS' APPOINTMENT AND REMUNERATION

For the purpose of selection of any Director, the Nomination & Remuneration Committee identifies persons of integrity who possess relevant expertise, experience and leadership qualities required for the position and also takes into consideration recommendation, if any, received from any member of the Board. The Committee also ensures that the incumbent fulfils such other criteria with regard to age and other qualifications as laid down under the Companies Act, 2013 or other applicable laws.

The Board, on the recommendation of the Nomination & Remuneration Committee, has framed a policy for selection, appointment and remuneration of Directors and Senior Management.

The summary of Remuneration Policy is disclosed in the Corporate Governance Report, which forms a part of this Report.

FAMILIARISATION PROGRAMME FOR THE INDEPENDENT DIRECTORS

In compliance with the requirements of the SEBI (LODR) Regulations, the Company has put in place a Familiarisation Programme for the Independent Directors to familiarize them with the Company, their roles, rights, responsibilities in the Company, nature of the industry in which the Company operates, business model etc. The detail of such programme is available on the website of the company www.sparc.life and may be accessed through the web link <http://www.sunpharma.in/regulatory-compliance.htm>.

NUMBER OF MEETINGS OF THE BOARD

The Board of Directors of the Company met four times during the previous financial year on 6th May, 2016, 29th July, 2016, 28th October, 2016 and 27th January, 2017. The particulars of attendance of the Directors at the said meetings are detailed in the Corporate Governance Report which forms a part of this Report. The intervening gaps between the meetings were within the period prescribed under the Companies Act, 2013 and SEBI (LODR) Regulations.

EVALUATION OF PERFORMANCE OF THE BOARD, ITS COMMITTEES AND INDIVIDUAL DIRECTORS

In view of Securities and Exchange Board of India's ('SEBI') notification no. SEBI/HO/CFD/CMD/CIR/P/2017/004 dated 5th January, 2016 on 'Guidance Note on Board Evaluation', the Board of Directors, on the recommendation of the Nomination & Remuneration Committee, adopted revised set of criteria, aligned with the recommendations of SEBI, for evaluation of the Board of Directors of the Company, including the individual Directors and the Committees of the Board.

The Board of Directors have also carried out an annual evaluation of its own performance, its various committees and individual directors pursuant to the provisions of the Act and the Corporate Governance requirements as prescribed under regulation 17(10), 25(4) and other applicable provisions of the SEBI (Listing Obligation and Disclosure Requirements) Regulations, 2015.

The performance of the Board was evaluated by the Board after seeking inputs from all the directors on the basis of various criteria such as Structure of the Board, Meetings of the Board, Functions of the Board, Board and Management, Professional Development, etc.

The performance of the committees was evaluated by the board after seeking inputs from the committee members on the basis of criteria such as Mandate and composition, Effectiveness of the Committee, Structure of the Committee and meetings, Independence of the Committee from the Board, Contribution to decisions of the Board etc.

The Board and the Nomination and Remuneration Committee reviewed the performance of the individual Non-Independent Directors on the basis of criteria such as qualifications, experience, knowledge & competency, fulfilment of functions, ability to function as a team, initiative, availability and attendance, commitment (as a Director), contribution & integrity.

The individual Independent Directors were reviewed, based on the additional criteria of Independence and Independent Views & Judgment. Similarly, the performance of the Chairman was evaluated based on the following additional criteria such as effectiveness of leadership and ability to steer the meetings, impartiality, commitment (as Chairperson) and ability to keep shareholders' interests in mind.

In a separate meeting of Independent Directors, performance of non-independent directors, performance of the various Committees of the Board and the Board as a whole and performance of the Chairman was evaluated, taking into account the views of the executive directors and non-executive directors. The same was discussed in the board meeting that followed the meeting of independent directors, at which the performance of the Board, its committees and individual Directors was also discussed.

CONSERVATION OF ENERGY, TECHNOLOGY ABSORPTION AND FOREIGN EXCHANGE EARNINGS AND OUTGO

I) CONSERVATION OF ENERGY

Our operations are not energy intensive. However, the Company endeavours to optimize the use of energy and has taken adequate steps to avoid wastage and has used the latest technology & equipment.

II) TECHNOLOGY ABSORPTION

RESEARCH & DEVELOPMENT

1. Specific areas in which R&D is carried out by the Company

SPARC works on innovation and new product development for regulated markets like US, EU & Japan, as well as for India and Emerging markets.

The Company develops New Chemical Entities and products based on its proprietary Novel Drug Delivery Systems. The Company's core therapeutic areas of interest include Oncology, Inflammation, Neurodegenerative Diseases and developing Abuse Deterrent Formulations.

The Company's current business model is to license out its products to potential partners and to generate revenue from upfront and milestone payments.

i) New Chemical Entities (NCE)

(a) Inflammation

SUN-0597 is a novel corticosteroid with improved safety profile. In pre-clinical models, it has shown low potential for skin atrophy and demonstrated better efficacy as compared to low and mid-potency steroids like Triamcinolone. SUN-0597 is being developed for treatment of Atopic Dermatitis and Psoriasis. SPARC has completed required toxicology studies for first in human clinical studies. The Company plans to initiate a Proof of Concept study in Psoriasis in FY18.

(b) Anticancer

SUN-K0706 and SUN-K0954 (back up compound) are potent, orally active and highly selective Bcr-Abl Tyrosine Kinase Inhibitors (TKIs) being developed for treatment of Chronic Myeloid Leukaemia (CML). In pre-clinical models, both the compounds have shown to inhibit key Imatinib resistant mutations including T315I mutations.

These compounds are highly selective and target very few kinases and have demonstrated very good safety profile in animal studies. For SUN-K0706 SPARC has completed Phase 1a studies in healthy volunteers and has initiated Phase 1b studies in CML patients. SUN-K0954 is under pre-clinical evaluation.

ii) Novel Drug Delivery Systems (NDDS)

(a) Gastric Retention System (GRS)

SPARC's innovative Gastric Retention System (GRS) allows longer retention of drug in the stomach and improves gastrointestinal absorption of drugs that have a narrow absorption window. SPARC has developed Baclofen GRS once - a - day using this technology for the treatment of spasticity. The Company has completed the patient enrolment for all the planned clinical studies and if results of these studies are positive, the Company plans to file the New Drug Application (NDA) by the end of FY18.

(b) Wrap Matrix™ Technology

This technology helps to develop multi-layered matrix-based functionally coated tablet, which offers controlled release for high dose and high solubility drugs. Once-a-day dosing can be achieved using this technology.

SPARC has developed Elepsia™ XR (Levetiracetam ER 1000 mg and 1500 mg), an anti-epileptic, using the Wrap Matrix™ Technology. The Company has been granted composition and dose specific patents for Elepsia™ XR in

the USA. NDA for Elepsia™ XR has been filed with USFDA for marketing approval and is under review. USFDA has communicated to SPARC that NDA cannot be approved until satisfactory resolution of the deficiencies identified at manufacturing facility during the recent USFDA inspection. Our manufacturing partner Sun Pharmaceutical Industries Ltd. is working with USFDA on remediation plans.

The Company has developed an extended release once-a-day dosage form of Tizanidine with the Company's proprietary Wrap Matrix™ Technology. It is designed such that the peak plasma levels are at much lower levels compared to the conventional 3 times dosing of Tizanidine. This is expected to reduce the dose limiting side effects of Tizanidine and to improve patient compliance. SPARC has completed Driving Simulation study of Tizanidine in EU and has established that Tizanidine ER causes less sedation compared to the available IR formulation.

(c) Nanotecton™ Technology

Nanotechnology based delivery systems (Nanotecton) enables targeted delivery of cytotoxic drugs to cancerous tissues. In this technology, drugs are encapsulated within nanoscale carriers derived from biocompatible and biodegradable polymers and lipids.

SPARC has developed Taclantis™ (PICN) using Nanotecton™ technology. This product is approved in India and successfully commercialized with the brand name Bevetex™. The Company has initiated pivotal BE study of Taclantis™ for its registration in the USA.

(d) Abuse Deterrent Formulations (ADF)

SPARC is working on a Novel Delivery Platform to help address the escalating problem of prescription drug abuse. It is estimated that every day in the United State 46 people die of prescription painkillers overdose.*

The Company has developed a platform technology to make a formulation which can deter oral multi-pill abuse. Presently there are no FDA approved opioid drugs in the US which can deter oral multi-pill abuse. The Company has filed patents for this technology. The Company has also filed IND for one program and completed initial Proof of Concept studies. This study has demonstrated viability of the technology.

(e) Novel Dry Powder Inhaler (DPI) device for Inhaled Drugs

SPARC's DPI is a pre-metered, 60 doses, breath activated device to administer an inhaled combination of Salmeterol and Fluticasone. This device offers uniform delivery of dose, independent of inspiratory flow rate. The device is small, convenient, easy-to-use and compliant with the global regulatory standards.

The Company is now executing pivotal studies. If the data from these studies are positive, the Company plans to submit NDA for obtaining the marketing authorization.

(f) Swollen Micelle Microemulsion (SMM) Technology

SMM is a quaternary ammonium preservative/surfactant (BAK)-free solubilizing technology. Contains known ocular lubricant which fortifies the lipid layer in formation of tear film and the uncharged coating is soft to eye surface.

Xelpros™ is a BAK (Benzalkonium Chloride , a preservative which has side effects on eye on long term use) -free Latanoprost eye drops developed with the Company's proprietary SMM technology.

SPARC's NDA for Xelpros™ is under review with USFDA. The approval is delayed because of the compliance issue of the Halol manufacturing facility of Sun Pharmaceutical Industries Ltd, from where it was manufactured and filed.

(g) TearAct™ Technology

SPARC is developing once-a-day formulation of Brimonidine using proprietary TearAct™ Technology. The technology involves Drug-resin complex suspension that provides a slow, consistent and sustained exposure. The fine resin particles act as a template on which the drug particle is adsorbed, Drug-resin clusters disintegrate into individual drug bound resin particles due to eye blink shear.

Brimonidine is one of the most commonly used second line drugs for Glaucoma. Brimonidine has to be administered thrice a day, leading to patient compliance issues. The Company is now doing Phase 2 clinical study of Brimonidine OD, results of which are expected by mid of FY18.

2. Benefits derived as a result of the above R&D

SPARC has been working on drug discovery and novel drug delivery technology based research programs which are complex and have longer duration of development with uncertain success outcome. SPARC's efforts target the international markets as well as markets like India, and this involves dealing with a number of regulatory agencies. Drug discovery programs upon commercialization are expected to provide patients with better treatment options and safer side effect profile.

The new drug delivery systems under development are platform technologies that can be developed for several different drugs. The eventual commercialization of such NDDS products would provide patients with newer dosage forms that are safer, more effective in terms of availability in the body, required in lesser dosage for the same action, or easier for the patient to take, or for the nursing staff to administer. For products such as ADF, the dosage form would be tougher to abuse.

3. Future plan of action

This is covered with the description of each product in (1) above. For more information, please refer to Management Discussion & Analysis (MD&A) section.

Independent Auditor's Report

TO THE MEMBERS OF
SUN PHARMA ADVANCED RESEARCH COMPANY LIMITED

Report on the Financial Statements

We have audited the accompanying financial statements of **SUN PHARMA ADVANCED RESEARCH COMPANY LIMITED** ("the Company"), which comprise the Balance Sheet as at 31st March, 2017, the Statement of Profit and Loss and the Cash Flow Statement for the year then ended, and a summary of the significant accounting policies and other explanatory information.

Management's Responsibility for the Financial Statements

The Company's Board of Directors is responsible for the matters stated in Section 134(5) of the Companies Act, 2013 ("the Act") with respect to the preparation of these financial statements that give a true and fair view of the financial position, financial performance and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the Accounting Standards prescribed under section 133 of the Act.

This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit.

In conducting our audit, we have taken into account the provisions of the Act, the accounting and auditing standards and matters which are required to be included in the audit report under the provisions of the Act and the Rules made thereunder.

We conducted our audit of the financial statements in accordance with the Standards on Auditing specified under Section 143(10) of the Act. Those Standards require that

we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and the disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal financial control relevant to the Company's preparation of the financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances. An audit also includes evaluating the appropriateness of the accounting policies used and the reasonableness of the accounting estimates made by the Company's Directors, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence obtained by us is sufficient and appropriate to provide a basis for our audit opinion on the financial statements.

Opinion

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid financial statements give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the Company as at 31st March, 2017, and its loss and its cash flows for the year ended on that date.

Report on Other Legal and Regulatory Requirements

1. As required by Section 143 (3) of the Act, based on our audit we report, to the extent applicable that:
 - a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.
 - b) In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books and the reports of the other auditors.
 - c) The Balance Sheet, the Statement of Profit and Loss, and the Cash Flow Statement dealt with by this Report are in agreement with the relevant books of account.

- d) In our opinion, the aforesaid financial statements comply with the Accounting Standards prescribed under section 133 of the Act.
- e) On the basis of the written representations received from the directors as on 31st March, 2017 taken on record by the Board of Directors, none of the directors is disqualified as on 31st March, 2017 from being appointed as a director in terms of Section 164 (2) of the Act.
- f) With respect to the adequacy of the internal financial controls over financial reporting of the Company, refer to our separate Report in "Annexure A". Our report expresses an unmodified opinion on the adequacy and operating effectiveness of the Company's internal financial controls over financial reporting.
- g) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, as amended, in our opinion and to the best of our information and according to the explanations given to us:
- i. The Company has disclosed the impact of pending litigations on its financial position in its financial statements – Refer Note 24(i)(b) and (c) to the financial statements;
 - ii. The Company did not have any long-term contracts including derivative contracts for which there were any material foreseeable losses;
- iii. There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company.
- iv. The Company has provided requisite disclosures in the financial statements as regards its holding and dealings in Specified Bank Notes as defined in the Notification S.O. 3407(E) dated the 8th November, 2016 of the Ministry of Finance, during the period from 8th November, 2016 to 30th December, 2016. Based on audit procedures performed and the representations provided to us by the management we report that the disclosures are in accordance with the books of account maintained by the Company and as produced to us by the Management. Refer Note 27 to the financial statements.
2. As required by the Companies (Auditor's Report) Order, 2016 ("the Order") issued by the Central Government in terms of Section 143(11) of the Act, we give in "Annexure B" a statement on the matters specified in paragraphs 3 and 4 of the Order.

Annexure “A” to the Independent Auditor’s Report

(Referred to in paragraph 1(f) under ‘Report on Other Legal and Regulatory Requirements’ section of our report of even date)

Report on the Internal Financial Controls Over Financial Reporting under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 (“the Act”)

We have audited the internal financial controls over financial reporting of **SUN PHARMA ADVANCED RESEARCH COMPANY LIMITED** (“the Company”) as of 31st March, 2017 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

Management’s Responsibility for Internal Financial Controls

The Company’s management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (“the Guidance Note”) issued by the Institute of Chartered Accountants of India (“the ICAI”). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to respective company’s policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

Auditor’s Responsibility

Our responsibility is to express an opinion on the Company’s internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note issued by the ICAI and the Standards on Auditing prescribed under Section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor’s judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company’s internal financial controls system over financial reporting.

Meaning of Internal Financial Controls Over Financial Reporting

A company’s internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility

of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, to the best of our information and according to the explanations given to us, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31st March,

2017, based on the internal control over financial reporting criteria established by the respective Company considering the essential components of internal control stated in the Guidance Note issued by the ICAI.

23 Significant Accounting Policies

i Basis of Preparation of Financial Statements

The financial statements of the Company have been prepared in accordance with the Generally Accepted Accounting Principles in India (Indian GAAP) to comply with the Accounting Standards specified under Section 133 of the Companies Act, 2013 and the relevant provisions of the Companies Act, 2013 ("the 2013 Act") as applicable. The financial statements have been prepared on accrual basis under the historical cost convention. The accounting policies adopted in the preparation of the financial statements are consistent with those followed in the previous year.

Notes Forming Part of the Financial Statements

for the year ended 31st March, 2017

ii Use of Estimates

The preparation of financial statements in conformity with the Generally Accepted Accounting Principles in India requires estimates and assumptions to be made that affect the reported amount of assets and liabilities and disclosure of contingent liabilities on the date of the financial statements and the reported amount of revenues and expenses during the reporting period. Difference between the actual result and estimates are recognised in the period in which the results are known / materialised.

iii Fixed Assets and Depreciation (Tangible Assets)

Fixed Assets are stated at historical cost less accumulated depreciation thereon and impairment losses, if any. Depreciable amount for assets is the cost of an asset, or other amount substituted for cost, less its estimated residual value. Depreciation on fixed assets has been provided on the Straight Line Method as per the useful life prescribed in Schedule II to the Companies Act, 2013. Assets costing ₹ 5,000 or less are charged off as expense in the year of purchase. The cost of fixed assets comprises its purchase price net of any trade discounts and rebates, any import duties and other taxes (other than those subsequently recoverable from the tax authorities), any directly attributable expenditure on making the asset ready for its intended use, other incidental expenses and interest on borrowings attributable to acquisition of qualifying fixed assets up to the date the asset is ready for its intended use.

iv Leases

Lease arrangements where risk and rewards incidental to ownership of the asset substantially vest with lessor are recognised as operating lease. Lease rental for assets taken on operating lease are recognised in the Statement of Profit and Loss on a straight line basis over the period of lease.

v Research and Development Cost

The research and development cost is accounted in accordance with Accounting Standard – 26 'Intangible Assets'. All related revenue expenditure incurred on original and planned investigation undertaken with the prospect of gaining new scientific or technical knowledge and understanding up to the time when it is possible to demonstrate probable future economic benefits, is recognised as research expenses and charged off to the Statement of Profit and Loss, as incurred. All subsequent expenditure incurred for product development on the application of research findings or other knowledge upon demonstration of probability of future economic benefits, prior to the commencement of production, to the extent identifiable and possible to segregate are accumulated and carried forward as development expenditure under Intangible assets under development, to be capitalised as an intangible asset on completion of the project. In case a project does not proceed as per expectations / plans, the same is abandoned and the amount classified as development expenditure under Intangible assets under development is charged off to the Statement of Profit and Loss.

vi Revenue Recognition

Sale of Technology / Know-how (rights, licenses and other intangibles) are recognised when performance obligation is completed or when risk and rewards of ownership of the products are passed on to the customers, which is generally as per agreement. License Fees / Royalty Income is recognised on accrual basis as per relevant agreement. Sales are stated net of returns, VAT/ Sales Tax, Service tax if any.

vii Investments

Investments are classified into Current and Long-term Investments. Current Investments are valued at lower of cost and fair value. Long-term Investments are stated at cost less provision, if any, for other than temporary diminution in the value of such investments.

viii Foreign Currency Transactions and Translations

Initial recognition

Notes Forming Part of the Financial Statements

for the year ended 31st March, 2017

Transactions in foreign currencies entered into by the Company are accounted at the exchange rate prevailing on the date of the transaction or at rate that closely approximate the rate at the date of the transaction.

Measurement at the balance sheet date

Foreign currency monetary items (other than derivative contracts) of the Company, outstanding at the balance sheet date are restated at the year-end rates. Non-monetary items of the Company are carried at historical cost.

Accounting for forward contracts

Premium / discount on forward exchange contracts, which are not intended for trading or speculation purposes, are amortised over the period of the contracts if such contracts relate to monetary items as at the balance sheet date. Any profit or loss arising on cancellation or renewal of such a forward exchange contract is recognised as income or as expense in the period in which such cancellation or renewal is made.

ix Derivative Contracts

Derivative contracts in the nature of currency forward contracts with an intention to hedge existing assets and liabilities are accounted as per the policy stated for Foreign currency transactions and translations.

All other derivative contracts entered into for hedging the future foreign currency fluctuation risk are accounted for on the principles of prudence as enunciated in Accounting Standard 1. Pursuant to this, losses if any on mark to market basis are recognised in Statement of Profit and Loss.

x Government Grants / Subsidies

Government grants are accounted when there is reasonable assurance that the Company will comply with the conditions attached to them and it is reasonably certain that the ultimate collection will be made. Capital subsidy in nature of Government Grants related to specific fixed assets is accounted for where collection is reasonably certain and the same is shown as a deduction from the gross value of the asset concerned in arriving at its book value and accordingly the depreciation is provided on the reduced book value.

xi Taxes on Income

Tax expenses comprises of Current tax and Deferred tax. Current Tax provision, if any, has been made on the basis of reliefs and deductions available under the Income Tax Act, 1961. Minimum Alternate Tax (MAT) credit entitlement available under the Income Tax Act, 1961 is recognised to the extent that there is convincing evidence that the Company will pay normal income tax during the specified future period. The Company reviews the carrying amount of MAT credit entitlement at each balance sheet date and writes down the carrying amount to the extent there is no longer convincing evidence that Company will pay normal income tax during the specified future period. Deferred tax resulting from "timing differences" between taxable and accounting income that originate in one period and are capable of being reversed in one or more subsequent period is accounted for using the tax rates and laws that are enacted or substantively enacted as on the Balance Sheet date. The deferred tax asset is recognised and carried forward only to the extent that there is a reasonable certainty that the assets can be realised in future. However, where there is unabsorbed capital expenditure or carry forward losses under taxation laws, deferred tax assets are recognized only if there is virtual certainty of realisation of such assets. Deferred tax assets are reviewed as at each Balance Sheet date.

xii Employee Benefits

Employee benefits include provident fund, employee state insurance scheme, gratuity and compensated absences.

Defined contribution plans

The Company's contribution to provident fund and employee state insurance scheme are considered as defined contribution plans and are charged as an expense based on the amount of contribution required to be made and when services are rendered by the employees

Notes Forming Part of the Financial Statements

for the year ended 31st March, 2017

Long-term employee benefits

Compensated absences which are not expected to occur within twelve months after the end of the period in which the employee renders the related service are recognised as a liability at the present value of the defined benefit obligation as at the balance sheet date ascertained on actuarial basis by an independent valuer and provided as per Company's rules.

Short-term employee benefits

The undiscounted amount of short-term employee benefits expected to be paid in exchange for the services rendered by employees are recognised during the year when the employees render the service. These benefits include performance incentive and compensated absences which are expected to occur within twelve months after the end of the period in which the employee renders the related service.

Gratuity

With respect to gratuity liability, Company contributes to LIC under Employee Group Gratuity Scheme. The cost of providing benefits is determined using the Projected Unit Credit method, with actuarial valuations being carried out at each balance sheet date. Actuarial gains and losses are recognised in the Statement of Profit and Loss in the period in which they occur. Past service cost is recognised immediately to the extent that the benefits are already vested and otherwise is amortised on a straight-line basis over the average period until the benefits become vested.

xiii Provisions, Contingent Liabilities and Contingent Assets

Provisions are recognised only when there is a present obligation as a result of past events and when a reliable estimate of the amount of the obligation can be made. Contingent liability is disclosed for (i) Possible obligations which will be confirmed only by uncertain future events not wholly within the control of the Company or (ii) Present obligations arising from past events where it is not probable that an outflow of resources will be required to settle the obligation or a reliable estimate of the amount of the obligation cannot be made. Contingent Assets are not recognised in the financial statements.

xiv Impairment of Assets

The Company assesses at each Balance Sheet date whether there is any indication that an asset may be impaired. If any such indication exists, the Company estimates the recoverable amount of the asset. If such recoverable amount of the asset or the recoverable amount of the cash generating unit to which the asset belongs is less than its carrying amount, the carrying amount is reduced to its recoverable amount. The reduction is treated as an impairment loss and is recognised in the Statement of Profit and Loss. If at the Balance Sheet date there is an indication that a previously assessed impairment loss no longer exists, the recoverable amount is reassessed and the asset is reflected at the lower of recoverable amount and the carrying amount that would have been determined had no impairment loss been recognised.

xv Share Issue Expenses

Expenses incurred in connection with issue of shares is accumulated and amortised over a period of 5 years from the year of issue of shares.

xvi Operating Cycle

Based on the nature of products / activities of the Company and the normal time between acquisition of assets and their realisation in cash or cash equivalents, the Company has determined its operating cycle as twelve months for the purpose of classification of its assets and liabilities as current and non-current.

of Conduct. All statutory regulations and laws of land are strictly adhered to underpinning the Company's 'research with responsibility' approach and philosophy. Maintaining the highest levels of stakeholder trust and creating sustained long-term value of all stakeholder both defines and drives the Company's good governance practices. Some of these include :

a. **Leading by Example**

The Board of Directors of the company lead the Responsibility drive by following, encouraging and steering fair business practices, adhering to compliance norms and ensuring a mechanism that regularly monitors and reviews BR across the organisation.

b. **Well defined Code of Conduct**

The Code of Conduct puts a clear frame and structure to clearly define and detail the legal and ethical code for its Directors and employees. The Code of Conduct lays a particular emphasis on deterring wrong-doings by explicitly listing practices like :

- Managing, resolving and ethically handling conflicts of interest over personal and professional relationships
- Safe-guarding and safe-keeping of confidential information including client-side and Company-side information
- Proper use and appropriate safe-keeping of the Company's assets
- Statutory and legal laws, rules and regulations – adherence and compliance

Section E: Principle-wise Performance

Principle 1: Businesses should conduct and govern themselves with Ethics, Transparency and Accountability.

1. Does the policy relating to ethics, bribery and corruption cover only the Company? Yes / No. Does it extend to the Group / Joint Ventures / Suppliers / Contractors / NGOs / Others?

Value and Responsibility are deeply embedded at the core of the company. The company lays equal emphasis on growth as well as being responsible, and therefore, follows a holistic approach of 'responsible growth'.

Transparency, Integrity, Governance and Accountability are central to the company's day to day functions and decisions. The Company inculcates and instills strong values and ethics which are framed in its Code

- Reporting process and procedure in case of any violation or non-compliance for internal purpose

Whistle-Blower Policy to safeguard Governance

The detailed whistle-blower policy of the company outlines the process to report and escalate any violation, breach, non-compliance, infringement or infraction of the Code of Conduct, including the provision for protection.

During the year, there were no violations to the Code of Conduct.

2. How many stakeholder complaints have been received in the past financial year and what percentage was satisfactorily resolved by the management? If so, provide details thereof, in about 50 words or so.

The Company had received six complaints from its equity shareholders during the previous financial year, all of which had been resolved during the year.

Principle 2: Business should provide goods and services that are safe and contribute to sustainability throughout their life cycle.

The Company's focus and long-term aim is to leverage the power of science to enhance and enrich human life empowering people attain more health and more happiness.

With its scientific research, the Company strives to deploy and leverage the latest developments to bridge the gap, as it were, between the requirements and needs of patients in various therapeutic areas. The Company's wide ranging research spans a large spectrum of treatment, cure and healthcare needs – from the complicated medication that targets rouge tumor cancer cells to a once-a-day glaucoma dose. And yet, the Company never loses sight of the fact that its processes and practices conform to highest benchmarks of sustainability.

Some examples :

- Novel self-dispersing Nanoparticle Technology – this overcomes the existing challenges in the water insoluble anti-cancer medication with higher drug localization into cancer cells, thus avoiding the use of toxic surfactant with the added advantage of delivering higher doses.
- Swollen Micelle Microemulsion (SMM) Technology – overcomes the problem of solubilising ophthalmic drugs

with Benzalkonium Chloride (BAK)-free solubilising technology, eliminating the use of toxic BAK which is known to damage ocular surface on chronic use.

- Wrap Matrix™ Technology – is an innovative oral controlled drug delivery system with a high drug to excipient ratio that reduces the pill size, helping patients to easily swallow tablets and pills.

The Company is currently developing several products based on New Drug Delivery Platforms like GRID, Wrap Matrix™ Technology, etc. and is also working on New Drug discovery.

Note - The Company is focused on R & D and does not manufacture any product. Hence, the following queries are not applicable.

1. List up to 3 of your products or services whose design has incorporated social or environmental concerns, risks and / or opportunities.
2. For each such product, provide the following details in respect of resource use (energy, water, raw material etc) per unit of product (optional):

 4. Has the Company undertaken any steps to procure goods and services from local and small producers, including communities surrounding their place of work? If yes, what steps have been taken to improve the capacity and capability of local and small vendors?
 5. Does the Company have a mechanism to recycle products and waste? If yes, what is the percentage of

recycling of products and waste? (Separately as < 5%, 5-10%, >10%) Also, provide details thereof, in about 50 words or so.

Principle 3: Businesses should promote the well-being of all employees.

People are the most valuable assets of the Company. The Company's key focus is on alleviating and improving human lives by leveraging scientific research. Thus, highly skilled and knowledgeable workforce that is both committed and passionate to the larger cause of making a difference are at the heart of the Company.

The Company is sharply focussed on augmenting the skills and capabilities of its 330+ scientists by providing them with fertile grounds in the form of environment and opportunities where seeds of ingenuity can sprout into shoots of innovation. HR initiatives are constantly endeavouring to create safe, healthy and happy work environment for the employees of the company by :

- Developing and sustaining a culture of excellence and knowledge driven approach. During the year, the company invested ~5000 hours in upskilling and Learning and Development activities which included 52% permanent employees and 23% of women employees.
- Ensuring that all research laboratories conform to highest safety and healthy standards
- An egalitarian approach driving equal opportunity to all
- Inculcating a culture of freedom of communications
- Rewarding and motivating employees
- While we are a Company, we are also a strongly-bonded family with a deep sense of mutual trust and respect, which explains the absence of any employee union.
